

Bags, Backpack and Trolley

QUALITY ASSURED

The Lock Test – Push & Release
The lock is operated continuously to test its durability.

Handle Test
Twitches are given to the handle of the bag in a loaded condition to test its strength and durability.

The Tumble Test
A loaded bag is subjected to tumbles in a large rotating drum with protruding obstacles to test the reliability of the parts.

Wheel Test
A loaded bag is subjected to linear motion to test the reliability of the wheels.

The Zipper Test – Force Applied to Sliders & Zippers.
Force is applied to sliders and zippers to test the strength of the zippers and pullers.

The Drop Test
A loaded bag is dropped on the ground on all corners.
